Feedback for RRMP Literature Review Summative

Tutor completing summative feedback: Karen Outram	Student number: 415090
Details of any extensions etc:	**Submission Attempt:** First submission Second submission

Criteria and weighting	Level	Comments
Knowledge and understanding of the topic/ issues under consideration (30%) To provide an overview of current knowledge on the chosen topic	**Excellent**	Excellent knowledge of the topic demonstrated. There is a targeted research approach in the content to reflect a strong strengths and limitations approach in the context of your chosen assignment topic.
Criticality (30%) To highlight similar and contrasting views on your chosen topic	**Excellent**	Excellent criticality. There is a dynamic point to point 'pros and cons' discussion in your content. There is research from multiple different authors, examining the different points of view regarding the summative content. A focused and concise discussion.
Use of relevant sources (20% To demonstrate an awareness of relevant, current literature	**Excellent**	Generally excellent use of research resources. There were a couple of points in the assignment where a few more citations would have further underpinned where your research was coming from, but these were relatively few and far between.
Structure and Presentation (as detailed in the assessment guidance) (10%) To showcase your research and writing skills.	**Excellent**	Excellent structure and presentation of the content overall, [please just look at the points raised in academic integrity]. There is a clear header and contents page, with appropriate sub-headers which make the content accessible. There is a strong concise academic tone to your writing and so continue with this approach for future summative.

Academic integrity (10%) To showcase your research and writing skills.	Very good	There are some phrases in your content that show direct matches to existing published content. This isn't too dramatic in this assignment, but for future assignments ensure that you paraphrase all the way away from original resource material to avoid any risk of high matches or plagiarism. Consider this for future summative. Some of your paragraphs tend to be long and you need to break these down in future. Some of the longer paragraphs had less citation for example and this is why it is important to have evenly balanced paragraphs for consistent distribution of research via citation.
Overall		

Positives:
- Mostly excellent outcomes
- With very good academic integrity
- And a very good outcome overall

Points for development:
- Just watch the scattering of direct phrase matches in your content – don't repeat this approach in future summative
- Some of your paragraphs are long with less citation – refer to feedback in the summative sheet
- Work on these points to give the opportunity of a more holistic grade in future summative.
